

EOS-ENVIRO Tarp System SATS-CH 11

The **EOS-ENVIRO Tarp System Series SATS-CH 11** is a proven sheeting system for any hook lift's equipment on the market coming in easy fit kit form for a simple and safe install. Operation is achieved hydraulically using the famous 'reach and rake' principle for arm adjustment when covering those awkward sized containers. The smooth ground level controls make the **EOS-ENVIRO Tarp System Series SATS-CH 11** a safe option when specifying a Hook-lift's sheeting system.

Features & Benefits:

- Quick, safe and easy to use
- Meets all the latest Health & Safety Guidelines
- Covers and contains loads
